

### A. Temporal: Pulsed Construction

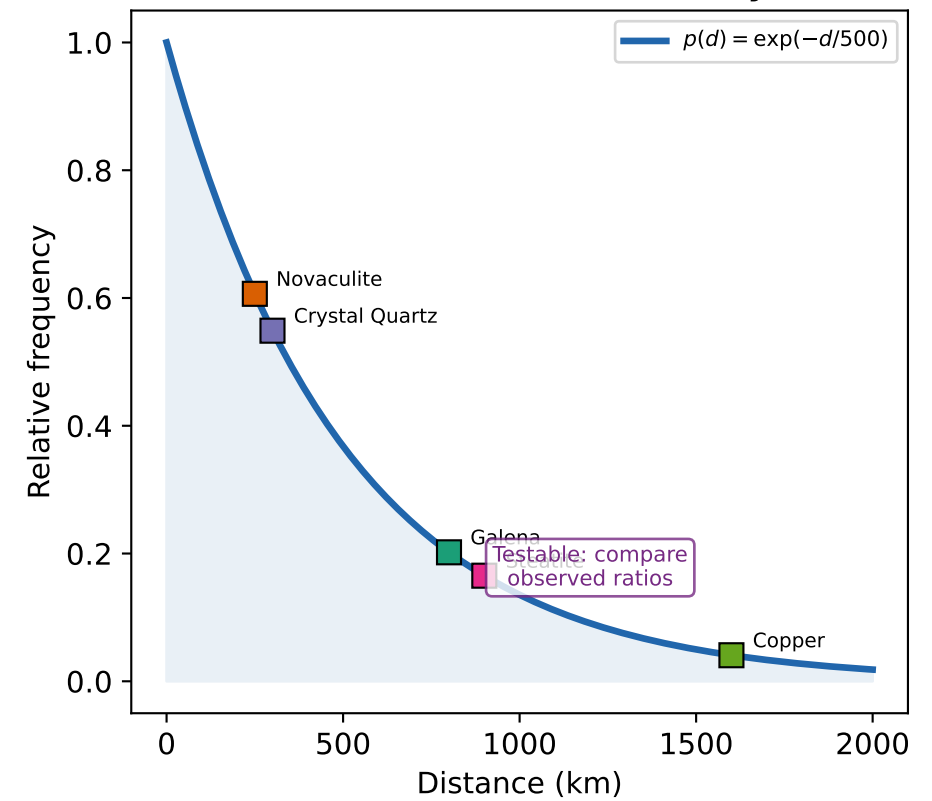

Prediction: construction pulses follow shortfall events

### B. Spatial: Participation Gradient

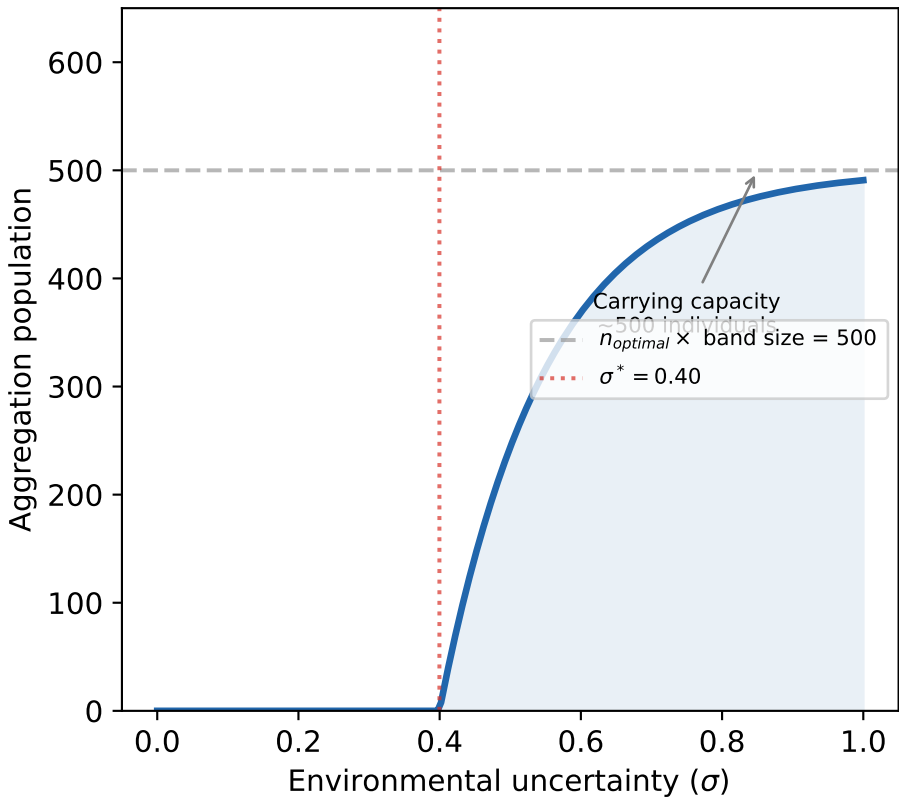

Prediction: site affiliation decays with distance

### C. Material: Distance Decay

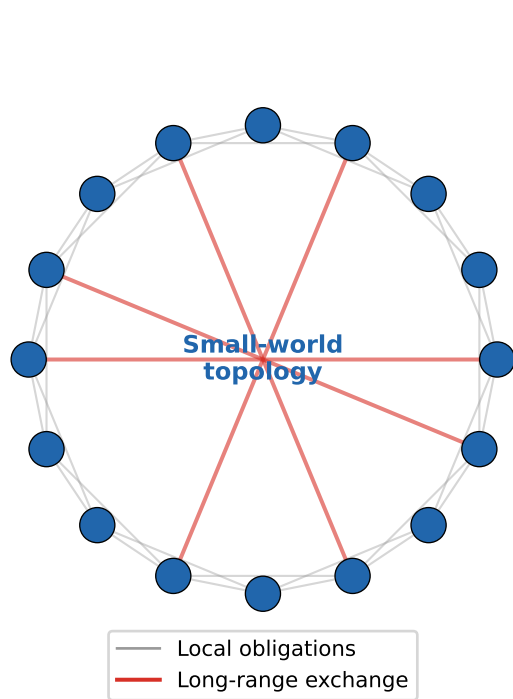

Prediction: novaculite ~13x more common than copper

### D. Demographic: Population Ceiling

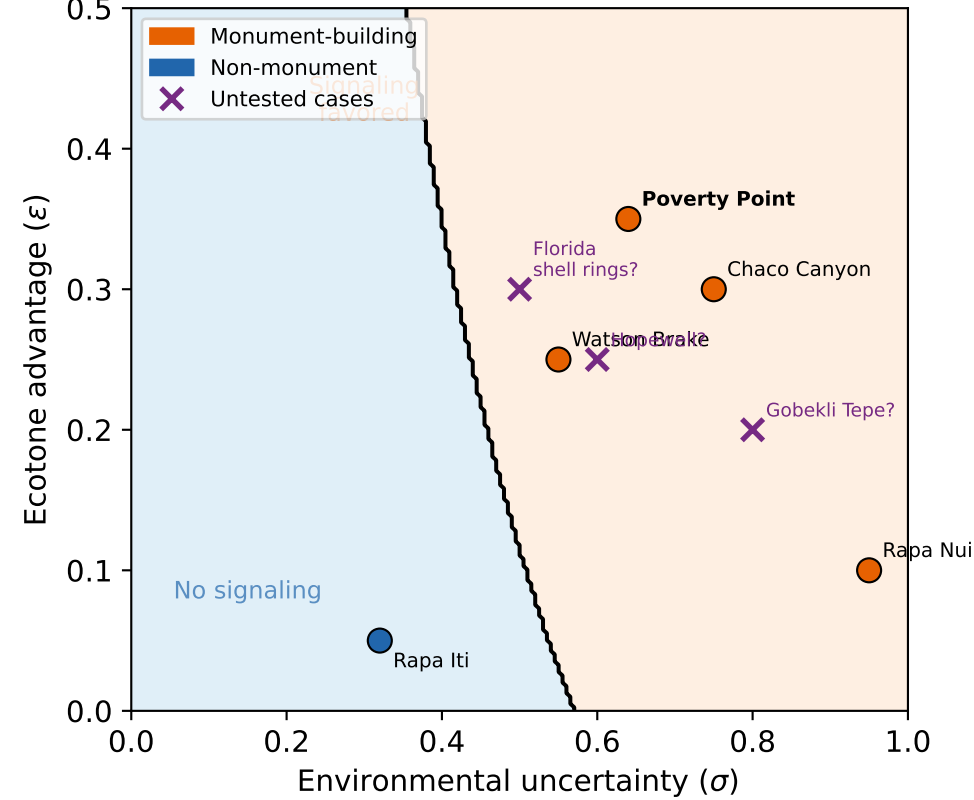

Prediction: aggregation saturates, does not grow indefinitely

### E. Network: Exchange Topology

Prediction: LA-ICP-MS should reveal multi-pathway exchange

### F. Cross-Cultural: Phase Space

Prediction: all hunter-gatherer monument sites fall above threshold
